ESG STRATEGY IMPLEMENTATION AND ORGANIZATIONAL TRANSFORMATION COURSE

Introduction

The Executive Course in ESG Strategy Implementation and Organizational Transformation equips senior executives, board members, transformation leaders, sustainability professionals, and change managers with the strategic knowledge and practical tools required to translate ESG strategies into organizational action. Participants will develop competencies in ESG governance, organizational change management, sustainability integration, stakeholder engagement, culture transformation, performance management, digital transformation, and continuous improvement to ensure ESG initiatives deliver measurable and sustainable results. The programme explores ESG strategy execution, organizational readiness, transformation leadership, governance structures, change management methodologies, stakeholder engagement, ESG performance measurement, sustainability reporting, innovation, and enterprise-wide integration. The programme aligns with internationally recognized standards and frameworks including the IFRS Sustainability Disclosure Standards (ISSB), Global Reporting Initiative (GRI), ISO 37301 Compliance Management Systems, ISO 37000 Governance of Organizations, ISO 31000 Risk Management, ISO 56002 Innovation Management, UN Global Compact, OECD Guidelines for Multinational Enterprises, and the United Nations Sustainable Development Goals (SDGs).

Course Objectives

- Develop practical ESG implementation strategies aligned with organizational objectives.
- Lead organizational transformation through structured change management approaches.
- Integrate ESG principles into governance, operations, culture, and decision-making.
- Strengthen stakeholder engagement and change communication.
