EXECUTIVE PROGRAMME IN SUSTAINABLE FINANCE, GREEN INVESTMENT AND CLIMATE FINANCE

Introduction

The Executive Programme in Sustainable Finance, Green Investment and Climate Finance equips senior executives, finance professionals, policymakers, investment managers, and development practitioners with the strategic knowledge and practical skills required to mobilize sustainable capital, finance climate-resilient development, and integrate ESG considerations into investment and financial decision-making. The programme explores emerging trends in sustainable finance, green financing instruments, climate finance mechanisms, ESG investing, blended finance, carbon finance, and responsible capital allocation while examining how financial institutions and organizations can create long-term value through sustainable investment strategies. Participants will gain practical insights into green bonds, sustainability-linked finance, climate funds, carbon markets, impact investing, sustainable infrastructure financing, ESG risk assessment, and innovative financing mechanisms that support sustainable development and climate resilience. The programme is aligned with globally recognized standards and frameworks, including the United Nations Sustainable Development Goals (SDGs), the Paris Agreement, the Principles for Responsible Investment (PRI), the Green Bond Principles (ICMA), the IFRS Sustainability Disclosure Standards (ISSB), the Task Force on Climate-related Financial Disclosures (TCFD), and the Climate Bonds Initiative (CBI).

Course Objectives

- Understand the principles and evolution of sustainable finance.
- Integrate ESG considerations into investment and financing decisions.
- Evaluate green investment opportunities and climate finance mechanisms.
- Apply blended finance approaches to sustainable development projects.
- Assess ESG-related financial risks and investment performance.

- Understand carbon finance and emissions trading systems.
- Mobilize sustainable capital for infrastructure and development.
- Strengthen responsible investment and portfolio management.
- Align financial strategies with international sustainability frameworks.
- Lead sustainable finance initiatives that create long-term economic, environmental, and social value

Course Modules
