SUSTAINABLE PROCUREMENT, ESG AND GREEN SUPPLY CHAIN MANAGEMENT COURSE

Introduction

This course is designed to help procurement executives integrate environmental, social and governance considerations into procurement, sourcing, contracting and supply chain decision-making. As organizations strengthen their sustainability commitments, procurement has become an important mechanism for influencing environmental performance, ethical business practices, responsible sourcing and sustainability performance throughout the value chain. The programme examines how organizations can move beyond conventional price-based procurement toward procurement decisions that consider total lifecycle value, environmental impacts, social responsibility, supplier governance, climate considerations and long-term sustainability. Participants learn how to develop sustainable procurement policies, incorporate ESG requirements into supplier selection and tender evaluation, conduct supplier sustainability assessments and establish ESG-related contract requirements and performance indicators. The course also explores green procurement, circular economy principles, responsible sourcing, human rights considerations and supply chain carbon management. The programme enables procurement and sustainability professionals to work together in developing supply chains that are commercially competitive, environmentally responsible, socially sustainable and resilient.

Course Objectives

- Understand sustainable procurement and ESG principles.
- Develop sustainable procurement policies and strategies.
- Integrate ESG considerations into procurement decision-making.
- Develop environmental and social criteria for supplier evaluation.
- Conduct supplier ESG and sustainability assessments.

- Apply green procurement and lifecycle approaches.
- Incorporate circular economy principles into procurement.
- Strengthen responsible and ethical sourcing.
- Develop sustainability clauses and KPIs for contracts.
- Establish sustainable supply chain performance frameworks

Course Modules

> Module 1: Sustainable Procurement and ESG Fundamentals
- Principles of sustainable procurement
- Environmental, social and governance dimensions
- Business case for sustainable procurement
- Procurement's role in organizational sustainability

> Module 2: Sustainable Procurement Strategy
- Developing sustainable procurement policies
- Establishing sustainability priorities
- Integrating sustainability into procurement planning
- Sustainable procurement implementation roadmaps

> Module 3: ESG Integration into Procurement
- Environmental procurement considerations
- Social procurement considerations
- Governance and supplier integrity
- ESG risk-based procurement decisions

> Module 4: Sustainable and Responsible Sourcing
- Responsible sourcing principles
- Supplier sustainability requirements
- Ethical supply chains
- Supply chain transparency and traceability

> Module 5: Green Procurement and Lifecycle Management
- Developing green specifications
- Lifecycle costing
- Environmental product considerations
- Resource and energy efficiency

> Module 6: Circular Procurement and Resource Efficiency
- Circular economy principles
- Reuse and recycling considerations
- Product lifecycle extension
- Circular procurement strategies

> Module 7: Supplier ESG Assessment and Due Diligence
- Supplier ESG screening
- Sustainability questionnaires and assessments
- Supplier sustainability audits
- Corrective action and supplier development

> Module 8: Climate and Carbon Management in Supply Chains
- Climate-related supply chain considerations
- Supply chain emissions
- Supplier carbon reduction initiatives
- Low-carbon sourcing strategies

> Module 9: Sustainable Contract Management
- Sustainability requirements in contracts
- ESG contract clauses
- Sustainability KPIs
- Supplier sustainability performance reviews

> Module 10: Sustainable Supply Chain Transformation
- Sustainable procurement governance
- ESG procurement dashboards
- Stakeholder engagement
- Sustainable supply chain improvement roadmaps
